

LOAD SHEDDING SCHEDULE

REVISION 1-2013

DATE: May 2013

Customers are informed that Emfuleni Local Municipality has been requested to participate in the national load shedding program. In order to reduce the resulting inconvenience as far as possible, a schedule has been drawn up to indicate which areas are intended to be affected at what time. The different stages are indicative of the quantity of electricity that Eskom needs to have removed from the network. Take note that you can be switched on or off a few minutes late. Customers must also note that although your area might be indicated to be switched off at a specific time, this might not always happen as we will only switch off the required quantity of electricity, required by Eskom, without necessarily affecting all the consumers in such areas.

Load Block No	Sub Load Block No	Substation	Customers Affected	Load [MW]
1	1A	Duncanville	Arcon Park, Duncanville, Vereeniging ext 1, Waldrift	10
	1B	Unibijl	SE6,7,8,10, Riverbend, Casino, University	10
